THE RIGHT SOLUTION

- STRONG
- WOOD-FREE
- 100 % RECYCLABLE
- SINGLE-MATERIAL

ELTETE FRAMEPACK

CASE STUDY

In this case, the client wanted to change their wooden packaging to a more recyclable and user-friendly packaging. The edgeboards are delivered ready-cut to the packaging station and stapled together by one person.

With this type of packaging Eltete clients have received several benefits including cost savings of up to 30 %.

100 % recyclable carton

CURRENT TRENDS IN PACKAGING

ELTETE FRAMEPACK IS D A PRODUCT OF ANY SIZE

MISSION IMPOSSIBLE?

An increasing number of companies are changing their packaging due to environmental thinking, new regulations such as the treatment of wood (ISPM15) and higher recycling costs.

Is it really possible to change a metal or a wooden frame to cartonboard?

IT IS POSSIBLE!

Innovative Eltete solutions can provide 100% recyclable and wood-free compact cartonboard packaging. Our know-how is based on careful planning and many years of experience, which has led to several successful case studies. The clients using Eltete FramePack belong to several different sectors such as white goods, air conditioners, bath tubs and motorcycles. The list is endless. For example, Electrolux is using Eltete FramePack in several countries to protect their ovens and other products during transportation.

ASSEMBLING IS E ALL YOU NEED AR

edgeboards

and/or other Eltete products

CASE STUDY

Our client wanted to reduce EPS and get more robust protection for the edges of their ovens. Soft packaging materials are not able to resist strong impact that might occur during transportation, any small scratch can lead to a compensation claim.

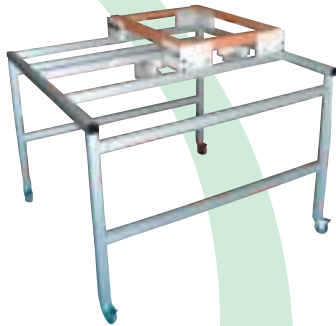

70 % of the EPS has been reduced and compact edgeboards have given the required edge protection for this new, good-looking packaging unit.

TRANSPORT PACKAGING SOLUTIONS

By using different elements from our range of products, we can provide each client with exactly the right packaging for their needs. It can be a frame with a cartonboard pallet or it can be another combination that will satisfy the requirements.

WHAT ARE THE BENEFITS THAT CAN BE ACHIEVED?

- Strong high-level protection also providing stacking strength
- Savings in handling and material costs
- Savings in transportation costs (especially air transport) due to weight reduction
- Savings in recycling costs
- Reduction of transport damage due to good visibility of the product
- Single-material packaging, easy handling
- Representative of your company
- Good company image due to wood-free, environmentally-friendly packaging

LET US HELP YOU FIND THE PACKAGING SOLUTION FOR YOU!

ELTETE FRAMEPACK

WHAT ABOUT STRENGTH?

- Each case is studied carefully
- Packaging is tailored according to individual requirements
- In stacking, the frame can carry loads up to 2000 kilograms
- All components are tested according to EN13393, European Standard: „Specification for Edge protectors“
- Solutions available to cope with all climatic conditions

This frame holds 1250 kg paperrolls

Electrolux is stacking 5 to 6 ovens on top of each other in stock

SINGLE-MATERIAL PACKAGING

Eltete solutions can be combined with many different packaging materials. An ideal packaging unit, however, is made out of only one material, which can easily be recycled. Compact cartonboard edgeboards fulfil these requirements and, even in warehousing, they occupy much less space than materials such as EPS and wood. Eltete Transport Packaging Solutions can provide a complete packaging solution complete with a frame and a cartonboard pallet.

Another important factor is that it will be very easy for the end-user to dispose of the packaging material, thus avoiding increased recycling costs. Soon this will be a requirement for many buyers as they are having problems meeting the new environmental restrictions. Packaging stations are already reacting to the new demands and reducing the amount of traditional materials previously used.

CAREFUL HANDLING

Good visibility for fragile products mean that they are handled more carefully, which further reduces transport damage.

Eltete TPM Ltd Engineering Division

Eltete designs and produces its own machine lines, meaning that the technology can be brought directly to the vicinity of customers worldwide, through joint venture partners and contract manufacturers.

Eltete TPM Ltd (Transport Packaging Materials) is a global carton board refiner, an ISO-certified supplier of 100% recyclable transport packaging material and a machine producer. With experience since 1974, we are experts on the needs of today's market. Innovative and high-quality packaging solutions made of compact carton board are being offered in more than 60 countries through the Eltete sales organisation. With production sites in 14 countries, Eltete TPM is one of the leading producers of edgeboards and packaging solutions in the world.
